TO WHOMSOEVER IT MAY CONCERN

As a software development company working on pharmaceutical quality management systems, we found Motto Systems Pvt. Ltd. as a best in class solution provider. Having built in-line to cGMP guidelines and customizable to our SOP requirements is the major advantage with GMPPro.

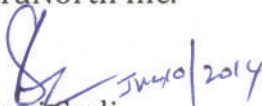

Motto Systems has consistently enabled us to produce thoroughly-checked and high-quality reports. We believe GMPPro has helped us to establish electronic versions of quality practices in various levels of our manufacturing operations. We have additionally noted that Motto Systems team has been very attentive during support calls.

In the process of working with Motto Systems, they were always very communicative with our team members, raising key issues for clarification in order for us to get the best final product.

"I recommend Motto Systems and GMPPro everywhere I can".

Sincerely

NutraNorth Inc.
